

Deet, the Chanel of the Bayou

September 9 and 16, 2022

Dawn was approaching, and with the rains came mosquito breeding pools.
mac fumbled for her Deet aerosol after her morning prayer.

*IZTA You protect Me from niggers even when all I understand is yellow. I advance
with courage. And these foes are held at bay, while with endurance You sustain
Me as I learn Your greatness includes red, and blue, that was hidden to Me
aforetime.*

mac Dukes, the Christ, Pentagon High Priest

Generating fractions of absolute light using electrons across the visible light spectrum via code that machine language compiles, is expressed with Arabic numerals ranging from one to nine and alpha characters "A" to "E". The scale includes "0" which means no energy in this place. It also includes "F" which means give it your all.

Zero and "F" represent the extremes. What would #666 or #666666 represent? Grey. That is part of the Unicode of values that computer programmers are just geeky enough to add to their vocabulary to create colour.

In the tri-value scheme, the pound sign like an ampersand is part of telling the machine how to classify the character that is a bit of information. Eight bits in a byte, yada, yada, yada. Creating a text string is for another lesson. Right now we are including colours with our ABC's of

Allness. Vector representations filled with pixels of colour on paper or a screen are beams in theoretical space a machine is hard coded to represent -- after compilation of the language a user writes -- with mathematic precision.

Light in its pure expression is #FFF. Fraction light and colour is expressed. The same expression is #ffffff, #FFFFFF, or #fff to represent whiteness. Light and white are synonyms in Unicode. Represent red, #F00, represent blue, #00F, represent yellow, #FF0. Green, sickly pale in apocalyptic terms, is #0F0. You want to paint it black? #000 please. This colour scheme is RGB.

Why A Learned One's Prayer Matters

This colour lesson is a function of mac's before dawn prayer broadcast to Spirit and the firmament, spirit, by God Almighty. There are moments mac wants to express depth of understanding that set on her mind as a strobe. Her mind holds understanding of what her body is throbbing. It may be a need to express gratitude, as in the colour lessons case.

mac's thoughts are interrupted by God Almighty, a little like Her sleep that He informs also. mac recognized a desire to express gratitude in the early week. When she uttered her prayer, a few mornings later, she articulated her appreciation while illustrating it in part with colour as she understands colour. Does she play with paint? Of course.

The importance of understanding the pale horse, sickly green, is realizing humanity would have built all its godly expressions with technology that replace the power of the Ggods when democracy earned the twofer. Greece and Rome faced other human foes, risen up by the gods to destroy their democratic society.

Famed democracies of history not bringing the Christ is a function of the Heavens still in a place of health; until antichrist. Once antichrist proved she was going after Allness then came the Christ. This is why so many scientific observations had divine power even when the scientist claimed atheism as a religion. Einstein, a great fornicator, liked his great spirit thing he called god. One who has an understanding of science has more ways of communicating with Spirit.

Sky Boat Song

If Jesus had been the Christ, Jesus would have taken down Rome. A reminder, it is not possible to murder mac. She is the Christ. If she were a blasphemer like Lady Diana was, mac would have been dead and buried by July 2, 2019. Her morning after reward for going live with

thetruegod.com. The first three articles mac had drafted on her iPad by June 29, 2019. She was in the hills of Virginia well outside Richmond. Spirit, Jehovah, tormented her for taking the same approach as others. The event before web publication release July 2, 2019, and a second are distinctive in character, and duration to be written about specifically.

Many times mac endured torment. When she was near releasing an instant messaging software product in 2018 she endured a night of torment and destroyed her qngmic company and product. She went to the Kyle hospital emergency room under orders from her doctor of twenty years Lewis Lane of Monarch Beach (Dana Point) California. The Kyle staff were criminally negligent in processing mac as a patient and charged her all the same.

mac would not hold onto anything, or one, who meant her Ggod hated her, or that she even did anything to displease her Ggod. The torments she endured she has not forgotten. While writing the Nineteenth Hole articles she will describe what being tormented by spirit is. Readers by then will have more Words of understanding. mac's relating a narrative now would be to a global audience of flesh with no common frame of reference.

Hanging in the Balance

Others placed in the perfect storm to wipe them out, such as Lady Diana and Selina, were not allowed to prevail. They had not sacrificed in any way that meant their faith in their gGod they revered over all other things. By December of 2019 mac was starting to understand no one wanted to repent, and she gave India the only directive that would have saved them as a populous and economy; hang a United States Flag above your nations flag at your national capitol building. Then of course mac would have been dealing with caring for one billion indiscriminate sex working fucker slaves.

Jesus, you know, died on a cross. You have depicted his torture stake upside down. mac wrote to that already. No, Charles does not have long on his throne. William is still gloating over his mommy being dead.

From the Jew

Spirit has a message for mac to pen and send to General Milley. Democracy he has proven false to doing, and talking out of both sides of his mouth. Milley will receive his complementary Depend, and two moral badges from mac's office. The badges; a three gram sealed lubricating jelly from MacKesson, and a made in China anime inch diameter pin-on button. After

deliberation the two items, one from the floor of the Greenwood Walmart toilet, the other from the seat of the nine-zero-one CCRTA-B, mac determined were bound for a prick, in the non biblical sense. Milley's gGod, who is not Jehovah, is angry at him in the profound. "UFO sightings? You stupid mother fucker."

mac, while not exuberant about waking up every morning, does understand it is, at least in theory, better to be alive. As in, to be dead is not regarded as good in the Bible. She endured trial proving her love of the colour God Almighty allowed her to see. Saint Paul's record of similar events is blatantly and briefly written about in Acts of Apostles. Saint Paul is the Ggod of Democracy.
