*li and Samuel's sons. One house was cut down.*

Roman time rules. Does this mean, the man who comes to the Sahara and changes colour is the Afrikaans rooi + man. [That is a leopard whose spots change.] has a time of his rules in play? What if the sentence were written, the rules of our time belong to the roman? That might indeed be a typo.

This linguistic thought experiment stretching your mind like a skin over a hollowed vessel to tan the truth out of you is due to the glaring merger of a suffix -mancy to a root word Rom where romancy is the use of divination to attract others to themselves for sexual conquest. Any more questions Pope? No wonder the Vatican needed to make sure all their priests were not married. Somehow they had to stop the fornications. Paedophilia was born in mass. Would you like to apply the same thought experiment methodology to that latter sentence?

Paddlers understand that introduction was deep hooking into the Roman Catholic Church and the history of its rules to maintain the dust of the bible whilst the Pope held the god contract nursing every possible year of power because, damnation, that Woman of God was a caution.

## Backgammoning You

No dice game [Yes, we at Team God enjoy our backgammon.] is involved with mac's discovery process. God Almighty uses those for His decisions. mac simply does not believe in shortcuts. Then she sets out to learn what the Godly decision means. That is a process for His slave.

Only mac can learn God Almighty's pun meaning. Tossing a coin to make a Godly decision would get you a bitchslapping by God. What you will get tossing a coin is a probabilistic outcome based on gravity, mass, motion, and wanker. A single sided coin is an oops. All of you

knew you were gods when mac was born. Bantling, what you romanced your bairn with, is on you.

It is righteousness to apply the good meaning to the pun and then understand in learning the true meaning God is not evil for teaching you its meaning if you suffer long. Satan is to blame for suffering. This is why Christ is God and not some shitty little god or god but God. (Not of Course to be confused with God Almighty who houses mac's spirit consciousness.)

None of you was allowed to suffer at all. That is mac's province as God's slave. Because all of you gods are such fucker fuckers, mac suffered at God Almighty's hand. What she did not understand was why Satan was allowed to be so close. mac insists as God tans her His rules of tapestry are righteous. mac went about wattling for y'all from the tapestry God Almighty created piercing her. That is being a faithful and discrete slave you fucking Ass Hole.

Never take what is due the firstborn. That gets you God Almighty's Bitchslapping. What was another one of mac's rules? Never would she consider herself under any circumstance greater than the Lamb. Some of you Bible readers just might be rethinking why them thar daughters got a son's inheritance from Moses.

The epiphany as mac opens the Holy Bible (New American Bible (Catholic)) to Samuel, "Isn't that something? The faithful slave gives their word and the Master says, 'We are going to do everything to make that happen.'" This was the dialogue in response to mac's understanding how she is wattling a wall. "I sure got in the sticks and mud didn't I?" Then mac realized the gravity of what she committed herself at outset of Dog Paddle to; building the walls and city for the Lamb. mac didn't bother to accuse turkeys. The technical term at Team God is fucker fuckers.

## The House

The curiosity between Eli and his son's and Samuel and his, is Samuel's reaction was irritated over a king being asked for as a rejection of his being a judge in Israel. The LORD simply comforted Samuel. Eli's sons were destroyed on the same day of battle alongside the ark.

There is no favouritism here. It is simple. Eli as judge raised fornicators that stole offerings from the people before even the aroma of the fat could be given by the Levites on the peoples behalf. Samuel's sons were in the place of being manipulated and pushed about by divining fornicators who were seeking to get rid of the judges.

The people got rid of their judges. mac has slaves when she is King. What she did was choose slaves not from the spirit shit that were offering her bribes of spiritual coin (think Bitcoin that We at Team God will destroy) [treasure with demons is not worth anything with God] that is why God made it clear in her belief system she was being lied to with every rape that promised reward. mac knew; no put it in writing, no physical delivery. Souls do deeds to prove what they commit to. The niggers are a class of diviners so in tune with their spirit they understood they were sending their spirit after mac. (Wow, you fuckers were fucking mac and God Almighty.) What is proof? Follow the headlines and you see the niggers moving to prove fucking God Almighty.

The famous understanding about delivery is; there is the presenter, what the presenter means, what the presenter said, and the audience and what the audience understood. The reader is the god translating what Team God presents. Are you going to accuse God Almighty of being wicked for the belief He instilled in His slave from your presentations?

mac's slaves are due to the extortion of Romanov for Christ's kingdom when king. It is not held against the Russian citizenry. mac expanded the realm because it was in her authority to do so. For the Paddler, yes, Romanovs are fucker fuckers.

Who are the gods in the heavenly art mac is connecting? military commanders. No civilian or non active duty military authority, retired commander, is directed toward mac. What does this mean? The superior gods are receiving their due. God, the human and future King, has spoken.

## The King

What is a lamb to the slaughter? How about the most fabulous genetics to walk the earth, beautiful and humble, sacrificed to Satan. Saul sought his fathers lost donkeys with a servant. Was Saul too proud to search for something as lowly as an ass? (hence, Christ riding on an ass, Ass) Out with a servant of his fathers house searching though neighbouring territories for miles and then will go to the seer for help but only if they had the appropriate gift. Then Saul is greeted by Samuel with the banquet and has no ability to acknowledge elevation. Saul refutes elevation with, my fathers house is the smallest and we are from the smallest tribe.

What Samuel is aware of beyond realizing when God says, "I am sending you your king tomorrow." we do not know. Samuel acted on God's word with, 'Oh, better slaughter the fatted calf and get the kettle on and have the guests gathered for the first glimpse of Israel's king.' Samuel was living in the days of God's word applied to physical reality. What was Israel in for?

The king their corrupting-conduct demanded. What is the significance of Saul's destruction? Did mac just say destruction? She just said he was so humble sayest the niggers. The greatest character assassination ever and then the scrabble of souls was on.

Samuel anoints Saul's head with oil and kisses him. Saul's word as the king is the word of the LORD. That is the importance of a king. Next Saul is greeted by the romancing seers of the land and becomes another man. Satan's spirit consciousness enters the world and Satan is the first king. Saul's suicide was Satan's exit. Genetics were not mapped to their own spirit consciousness since. mac's situation has been reversed. She was the prophet who had to interpret God's word when no physical fulfilment was presented before her that she herself did not have to make great sacrifice to accomplish. Go ahead, dig Me deeper. You have no idea what Team God has for a hook.

## Gold Mice

David never vanquished the Philistines. There were many battles. At one time David even relied on the Philistines when evading Saul who was at war with him. Of all the warrior's of Biblical Israel, David having tackled Goliath and warred with so many with success making God's word true gaining the inheritance of Judah's house and then some should have been able to clear to the coast. Zabulon was the one that was supposed to hold the coast and fight for it. Read Israel's blessing.

The Philistines even had the audacity to steal God's ark. Why didst not the LORD wipe them all out? The Philistines were simply the people who did not divine. Did they have a high priest of some kind for Dagon? Of course they did. When the ark sat in the temple that priest came in and dumped Dagon over to save the Philistines. Day two, the high priest knocked that monolith over again and hammering it to powerless representation. What was the priest making clear? 'I know we are using a god of stone to represent the blessing of the Big Bad God of God's we seek worshipping His woman, seeking good rain and seed to grow food and thrive.' God's Woman was the power the Philistines were seeking. That is what God's ark represented. God's Woman means law and food. The people needed that big icon and the icon's president knew to humble their idol before the ark of the LORD. That president listened to his god.

Worshipping that gold box because it was a gold box was a head shaker. But these were people that needed an icon. This citizenry was not the bearer of the law that went with the privilege to having God's mercy seat. The LORD was heavy on the people and they knew the ark

was the reason for their affliction. Respecting the LORD these people consulted seer's who listened to their gods to find out the prophetic gift and circumstances that needed to go with the ark's return to Israel.

What did these seers make clear, make a gift of gold of what you were afflicted with. And send the ark away. Enjoy your tumours and terror that you mocked in the previous Herald article. Don't forget mac's legal settlement is not a gift of gold it is her due. Mice were present from the poor grain storage and carelessness of the Philistines, plague was a natural from the mice, rat, flea. This gift was a bonus for the plague to be lifted. It was in the LORD'S power to do so and He backed His spirit children (gods).
