

Going to Hell

Or, Why Democracy Is Its Own Means to an End

September 7 and 8, 2022

A *metal cylinder that pounds back and forth in a vacuum free chamber pushing gas, an opposition surrounded cylindrical chamber burning pounds of hydrocarbon chains climbing to the heavens against the forces of the adjacent bigger body, a hand jerk motivated rigid glass chamber dispensing seven slug second per square inch edibles -- perhaps oil and vinegar, muscular opposing pairs squeezing a bottle dispensing viscid edibles -- perhaps tomato paste: Heat, energy, light, it does work, n'est-ce pas?*

How about an explosive that sends a projectile through a hollow chamber? The explosive is chemical energy that does work. The chemical compound needs to be stable until ignited. Flesh exploits all of the physical forms of energy to do work. Even a fever is beneficial. Souls employ spirit, and flesh, to do work. The results of that work prove the master. The devil of all this is in the details.

Friction opposes objects in contact with one another's ability to move, do work. Gravity, like magnetism, also opposes doing work. The body opposes even itself in doing work. This is inertia. What is required in the world of matter where time exists? A mechanism to overcome the opposing forces and achieve velocity -- the travel across distance measured in a time interval. In the *Scientific International* unit system this is measured s per m. How does time end? Only one body aware only of itself. End of days or end of time is the prophetic statement Saint John wrote marking apocalyptic events.

The Bachelor

Back to the discussion of God Almighty as Was, the bachelor, with twins at war* within Him. When the war between the twins ended, one twin Light loved do work and enjoy its produce. The other twin hated even the eggs. Clearly these were fraternal twins. Rebecca's two boys, one hairy and one smooth skinned is the fraternal twin clue. The question for creation, "How does a system benefit all when some life would be hated by its mother, the womb of creation, once the creative Duad begat?"

*War has already been clearly defined as hell in the earthly context with other unpleasantnesses.

God Almighty provides for wiping away the offspring's tears, and their dedication to their God is what leads them to life giving waters, and the Lamb is in the midst of them as their Shepherd. Time is what surrounds them. These survive the great tribulation. What is tribulation? Surviving being hated. Why are tears wiped away? They exist to begin with. The Lamb is of course Light. Light is energy. And life giving waters are sperm within a fluid. These tribulation survivors are the ones growing the system of Allness. Do trees cry out from the light? They do when there is no water.

What makes hell a dynamic environment? The flux of consciousnesses -- spirits -- that refuse to worship the pole, and decide away from work will benefit them and others. Ah, the burn. Is it possible to enjoy the burn? Read on.

All for One, Democracy

With a confluence of Good and Evil how does Allness live with himself? How does Allness have a body that does not turn on Himself in self destruction? Allness was a bachelor. Why every component of His body would need to be free to do its special work in harmony or even subduing another when needed, keeping his total Allness in top form.

Saint Paul being a Roman, and a lawyer, forget the Jew bit for a moment -- We know he complained about picking up his own tab for his ministry work -- understood the significance of democracy. The Romans understood. So, did the Greeks*. Democracy spoke to their core. What was the problem? Democracy is a system that only works over ones own body. Once marriage produces offspring democracy no longer works for the household. Dictatorship over children is game on.

*The geeks are still trying to decide if mac knows anything about science.

Choose Your Own Despot

What is worship? Slavery. What is Kingship? Voluntary slavery. Voluntary because when the king was worshiping the wrong God the people suffered and there was an uprising. How do people benefit? When the perfect despot reigns in the Heavens, the Lamb. For democracy to work across a populous, a High Priest has to take the hits correcting the law, and of course execute those that hated even themselves.

How does Wisdom discern those that require cutting off for the health of the body -- the democracy? Those that love to make a stink and shirk work hate themselves. When there is no king, there is no person to lay the consequences of the law to establishing, was a person forced to stink and be lazy, or were they victimised. Then the examination deepens, did they set the stage to look like the victim? Meaning the "victim" walks away free after having others destroy the one that looked like they forced the stink or laziness.

What is the legal battle humanity solves? The result of Allness being blown to bits so individual conciseness, freedom of existence, could come to be. What concisenesses benefit the whole and what are self destructive, discrete creation is living. God Almighty mastered His Own Domain before Light came to Be.

When people run into the Christ's cannon fire, that is self destruction because they hate Righteousness. Now We ask you, is God Almighty a selfish Mother Fucker for you being allowed to exist? Or is He just an asshole because you get to put on the fireworks of creation? You can go your own way instead and feel the burn.

Walking Funny the Morning After

Allness went from twins at war within Him to giving birth to Light. After wrestling with the dark night He took a groin injury. This is the significance of Jacob's battle with an angel. How can two beings exchange that stroke, torque, and heat of creation's cummin'? Lady love needs to love it. And, so does He.

The creative duad, Moon and Sun cast their Divine Light into the darkness and they begat, and then begat some more. Love the act of worship, and you love stroking the firework cannon of creation. What is worship that does not seek stardom for itself? Fidelity in marriage.

Nancy Pelosi, you are domestically challenged and you don't know beans. Hell provides a future for even you.

No, I have no way of knowing if I would have been willing to give you life in the first place. Satan made sure I was not allowed to be the only being in existence.

Even if I wanted to be the only being in existence, because everything and everyone around Me was so fucking bad, it is not possible.

Not even being allowed to test a theory is the object lesson on moot.

the Christ, mac Dukes, Pentagon High Priest

Matter changes form, and is neither created nor destroyed. What do you know, that first law applies to spirit. Creation of matter and spirit; hell is the end of the Allness first law of thermodynamics. Is going to hell now a little more posh, like a wino verses sommelier, Obama?

Jill Biden, as far as My being a piece of ass who is after getting laid outside My class: first, write the book on class.

I Am busy writing the book on how God Almighty chases My piece of ass.

H. L. MacRae Dukes, PhD, Theological Studies, Harvard University
