

Hey Abbott

October 16, 2021

*Governor Greg Abbott and the Donald destroyed the state of Texas and bankrupt the United States of America declaring war with Mexico and all lands south of the Rio Grande. (This is five years ahead of schedule.) You stupid niggers just wouldn't stop dickening Mef***a's anus for power. Melania is one costly witch feeding from anitchrist's trough. mac saved the life of the nigger you needed to murder while your nigger of interest was driving the Greyhound bus mac passengered shotgun. The fiction of Clinton's new novel comes to life in Austin and the greater Oakland area because of Billy the Clinton's greed to fuck mac in revenge for loosing his qngmic United States Justice Department's golden ticket free pass.*

It is true, mac hates the spirit shit. When spirit shit can speak for itself and the purgatory demons are enduring ends and as a whole sole the demon, sprit, is moving its soul making it speak, act, do then mac can meet souls she will want to preserve. Right now mac, God, is doing everything needed to shut down North America and the entire United Kingdom and all its extended trashy little regions of fornication the world over. Call this God's revenge for abusing her. (Putin stop wearing polka-dots. mac understands you lost the thousand dollars in Nathan Detroit fashion. Polka dots and bow ties are just the mark of a woman. Christ's Church opening does mean manhood can be yours. Trying to prove you are equal to Biden just makes you a moron. Russia can be better than the United States. End the competition.)

All chattels of the United Kingdom and United Nations military units are target practice. We at Team God will clean up the pollution later. Right now consider these are live targets and can shoot back. What do we at Team God want? For the stupid fuckers of Great Britain to launch their nukes in assault against the whole globe in frustration. These are the weak link women in

defence. (Yes every human with a penis in the United Kingdom is a woman. We at Team God hate all citizens of the United Kingdom.)

The border walls of Texas and California (Arizona and New Mexico are just bonus) are now under assault with every form of destruction including chemical and nuclear (dirty) bombs from south of the Rio Grande cartels and citizens globally seeking citizenship. Sister organisations state-side will be bombing with terror attacks against United States Border Patrol agents and abducting their families trafficking their wives and children to feed cartel soldiers pleasure.

As all of North America belongs to God, the United States Armed Forces will not be capable of subduing the violence with any measure less than a full scale nuclear assault against every acre producing any volume of narcotic.

You refused to make room for God in government or military service. mac had no way of protecting you. mac was allowed to save her own life aboard that Greyhound bus. (That the bus was filled to capacity with witnesses is just bonus.) Understand holocaust weather events will only continue to aid in destruction and mayhem against California and Texas. Weather is Team God's direct front line to destroy niggers. You want the weather to be on your side? You need mac on your side and she favours Iran and Afghanistan to win global domination under her command. (All peoples of Pakistan are being wiped out with mac's blessing. Do not hurt Kashmir and that is an order.)

What does Christ say of mac's introduction? Melania's followers (demons) are all that rude and Melania Trump is just that greedy for spirit shit companionship.

What is mac waiting for? the promised volcanic eruption of Mammoth Mountain and the severing of Big Bear Lake. What is even more spectacular? watching the Hotel Del sink into the Pacific. Mocking God is costly Donald. (You can think duck.)

Post Script, mac wants China to blow up all of Taiwan. Don't be pussies China. Just nuke that fucking island and evaporate it. God's servants trapped into that duty will be resurrected under Ted's command.
