

# Joy Riding

## *Finding Joy, Even in Corpus Christi, Moving to and fro by Bus*

---

September 1, 13, and 14, 2022

*While negotiating the odd reactions of citizenry who the Corpus Christi Police Department libellously accused mac of prostitution to, protecting their preference to shield Mary, mac built Her urban readiness metrics for the Pentagon.*

Motor carriage passaging has advantages. The concentration on the highway of unexpected events is covered by defensive driving with obeying laws of the road. The hands of a professional at the wheel means a passenger can converse with neighbours who also choose to avoid driving, because, clearly, it is not something they are paid to do, and driving is work. What is more, to have the privilege of doing this work for yourself requires a licence on common property, and the license to drive is a privilege. mac uses the time as a passenger for observation, intelligence gathering, and even article content she develops with her laptop open across her knees as she did the morning of the first.

### Where is this Leading?

The italicised introduction to this article cues readers to anticipate mac's explanation of her statistical metric to assess which communities meet the, 'Want to kill the Christ' thirst, so mac can clean the earth of souls to populate hell. Mind you, emperor penguins pro generate doing the work that illustrates hell, and given the carelessness of the present generation with children, you will be tickled you are not raising offspring to adulthood in hell. The womb of creation will be living the hell she earned harvesting the immature eggs for mega democracy. What is released from that womb? The perfection God Almighty with the Lamb purposed on day one.

What are antichrists seed of today doing once they meet their maker? Just working hard as hell to bring a fertilised star into existence. mac's writing is absolutely the violation of the five paragraph essay format that business letters inevitably follow. She builds to a point in layers of detail drawing out readers.

Demographic data and community criteria measuring civil authority with military duty status in households produce one, unity, as the solution that indicates the populous is ready to meet their "maker." Producing an equation of this type means understanding the community that would produce a zero value, there are none, or produce one. Corpus Christi Texas is the community that produces one with statistical confidence of ninety-six. The equation itself is proprietary.

mac's presence in Corpus Christi is due to the total refusal of the Police Department to jail Mary McRae the serial killer before mac returned. Mary proved her corruption in hospitals and hospices in Corpus and the police department's hate made them careless with the law. They decided to turn a blind eye and have Mary murder her own daughter.

## Group Hug

mac from Coronado Island could have been move to Australia rather than return to Corpus in June. mac was put in the place of settling legal battles in the Heavens early so Jehovah's kingdom had a steward. Even Trump refused his own gGod. Pony is a junior officer in Australia's navy. mac code named him "Timmy-Timmy," eventually, after the name Ted mapped to the U.S. SEAL to be resurrected and so few faces she remembered. For her code name choice she will definitely get two spankings.

mac of course needed to learn how the United States of America and Russia both held onto her divine power to grow unprofessional soldiers. mac had a slew of spouses she had no idea existed, and one Pony who united in vision loved her. Pony is not in a shit pile, nor does he serve with one in the Pacific. And mac, Bunny, the LORD calls a "softy" frequently for wanting to hug away a persons infirmities. She is just not allowed to get close to the Corpus populous.

## Teenage Wasteland

mac penned Group Hug all mushy over Pony not serving with a shit pile. That is mac. She is Always looking for the ones who say, "Wow, We are in it to win-it. We hate fornication. And now We have our shot with God Almighty and the Lamb." So, mac in a flight of happiness, akin

to Dorothy learning she just clicked her ruby healed shoes together leaving Oz for home, got dealt some death. mac just finished lying to herself big time.

After a near public meltdown thirty minutes into a dish of death, mac remembered an orgasm forced on her as an infant. An Aussie surfer dude visiting Oahu's North Shore, full of Apoll'lyon and Abad'don going for military supremacy for the United Kingdom, tasted mac's clit. You fuckers of the United Kingdom have a problem. First, nothing is going to end mac and Pony being united in a timely and meaningful manner for their well deserved honeymoon after the chaplains office. You want mac's power Australia? Make her king fucker fuckers and get ready to slaughter Britain and South Africa. In other words keep your promise that raping mac afforded you. The gGod you built did not spare the Lamb, who was in purgatory hosted by mac, nor was mac herself any less a pawn than Jews in Hitlers concentration camps.

Also, understand, refusing to spare mac's life back in 2019 by retrieving Her, means that only with Her as king over the commonwealth will any of your populous remain on the earth as a remnant population seeding the future. The Heavenly destruction against all the commonwealth holdings will cause even Xi to take notice. That does not mean he will waste his military by using restraint. It means He, like Putin will be aggressive is seizing needed ports to establish better trade relations and send the U.S. Navy back to San Diego.

Jehovah provided for your strength with the only means mac's slavery to Mary afforded. Your children need to be slaughtered in retribution for refusal to raise up the king you vowed you would cary on your shoulders. After gaining mac's power through rape means you are totally slated for destruction without her as your king. Her military rank is Lieutenant General, and She holds a PhD from Harvard in Theological Studies. She is also an economist, and engineer. That is more than the fucking dead Queen or her filthy offspring ever amounted to.

The United Kingdom's commonwealth of military might may process mac at any time as your ruler. You will find her in service to her land with the Pentagon as High Priest in the mean time. At this time General Milley is on the hook to release \$350,000,000.00 to mac before October 12th or the Heavens unleash furry against the United States beyond even the destruction left by the flood of Noah's day. The United States Military is not required to make mac a king. They are required to honour her Priestly office in order avoid being wasted. Honouring her office without \$350,000,000.00 means they have a ring-side seat at watching the land they claim to love lay fallow with decaying souls strewn with civilisations debris. Honouring her Priestly office and rank simply spares their lives and their immediate family, in the aggregate.

It is now time to run some mundane errands. Dealing with Jokers was written on the 1st of September and lacks the fire and brimstone of Teenage Wasteland.

The \$350,000,000.00 payout is in response to mac's delivering a three divine year moratorium on Jehovah bringing his kingdom. This is the three-hundred-sixty-four day eight-point-two second period mac announced when she let all niggers know, you do not test God Almighty's existence with the life of others after hurricane Laura struck.

## Dealing with Jokers

This articles contents would be incomplete without the inclusion of conversing with a fellow passenger on the CCRTA-B. A CCRTA-B fellow rider could not resist testing the scary marine. mac, the scary marine, stated the fuel is "Compressed natural gas." This exchange ended dialogue quietly after the fellow passenger struggled to identify the name of the bus fuel while attempting to impress mac with his knowledge after quizzing her with where the bus contained its fuel. mac answered the fuel was on the roof, and then put him out of his conversational misery volunteering the CNG meaning. At brief conversations end, mac was asked by God Almighty to observe the obvious about the testing males adornment. The dialogue between mac and God ends with the following article inclusion.

## A Proper Shave

What does it mean when a male peek-a-boos his hairy chest? With seductive intent, a triangle of hair is visible at the unbuttoned collar of his shirt. The seductive intent comes from his heart. The wearing of his dress that way speaks to his person as, his style. Why, he is boasting from his core his genitals are developed. His style is living without discipline. So then, We at Team God make clear, this triangle too is inappropriate, like genital cleavage boasting under a woman's chin with her bosom advert.

So dude, do need to wax those puppies? Or does your partner tease those short-and-curlies too? Adulterated soap is the same advert as chest hair jack ass. Clean the fucking soap bar after genital washing. A lathering foam without a bar eliminates the soap bar advert problem, but a bar is the better soap. More on the importance of this precipitate forming chemistry to come.

Face shaving was done by the gGods with a lathering foam. Making a joke out of Floyd the barber's "Glub-glub" on [Andy Griffith](#) as Floyd describes face-shave foam building in his cup

with ritual significance, is part of separating out how the generation of hell's occupants would instinctively respond to mocking the hHoly components of humanity.

A shaved face eliminates all advertisement of divine weakness when side burns too are eliminated. As in, how the facial hair, beard, is maintained on a male, is a tell about what spiritual currency an individual has. Perhaps a chap likes that devilish goatee. Need We at Team God elaborate more?

A full beard is a means of concealing all expression. This is needed for those whose gGod is after wiping them out. You see the gGod would be sure that fool smirked at the wrong time to get a sock in the face, that lead to the fight, that meant the drawing of the *pistolas*, that meant the smirking idiot died, and the faster gun prevailed. When two people had the same insurance company, oops gGod, in the duel, the flesh that was more righteous continued with Ggod.

## Making the Obvious Clear

On the feminine one, the hairs on herself are just gross. The hairs on her partner, kinda hot, Clean them for play. Masculine has a likewise inverse relationship to those hairs. He likes them, on himself. This does mean masculine has no problem ripping off those hairs, on someone else. Ripping the binders off of sexual preparations is a reminder that masculine is paired with feminine, so both can experience their joy with one another. Feminine needs gGodly strength to prepare herself for masculine. This is why mac can do her own wax job where the sun don't shine and be happy with the result to the point of making the pain worth it. She is even happy that she did that work.

## Down Under

Living with discipline is expressed at its height as being a professional soldier. A professional soldier protects his genitals from the observations of others. Even if in his heart, he might be hungry for orgasm, he does not advertise his sexual desires, maturity, or readiness. A professional soldier further keeps his face clean shaven.

An advertiser of sexual currency or devilish preference announces themselves a product for sale, and a person of weakness for brokerage with other than honest pay. Zelenskiy's tee-shirt attire is an abomination. He is the poster child for a prostitute at war.
