What you need to know about Satan. Yep, she had a choice.

There is the body, genetics. The organism on its own dies. Cells die in progression. The decay cycle releases heat. All these are components of the bodies decay. There is consciousness. Awareness. The, "I think therefore I am," pontifications fit with awareness. Who delivered the breath of life into the organism making it an aware, living, body? God to Adam. Eve God created conscious from Adam's rib. Eve required two X-chromosomes for the vagina, clitoris, labial folds, womb, and features appurtenant to female.

Get Your Hanky Ready

mac wears Levi's. The mens shrink-to-fit, 501, button-fly, unwashed original she will miss if Levi does not get their head out of their ass. She can't find her 28x32's on a shelf in the store and online purchasing is a no-no. (The women's 501 28 are her fat jean. She is searching for 26's.) She spent thirty minutes attempting to order two pair at Macy's but they wouldn't allow her to pay cash for the order. So, they turned her away as a customer. This was back in November 2020 and the two pairs of jeans would have arrived by December 8th. mac is still shopping for where she can purchase those two pair of Levi's.

The Wave Offering

This is not the digression one would think. First, buying in stores is essential for survival. The object is in your hand first and the sin in your blood has ample opportunity to be subdued by God before making a purchase. Using the internet to learn where inventory exists, fine. Learn about the product in advance to see if what was written the online merchant described accurately, great. Buying is what an individual does in obedience to God. This is when and where He stipulates. Our High Priest makes the wave offering on our behalf. Without that precious wave offering nothing has been done to release us, the consumer, from the perversion of the manufacturer, retailer, or previous owner (MRPo). There are some MRPo's that refuse to permit

goods from them be sanctified to God by Christ for our consumption. Ordering online, the process, is over for God's people.

The Wardrobe

Wearing the pants in the family meant something before the disco era. mac wears either her jeans, an infamous pair of cut-offs, or dresses. She does not wear suit pants. There is nothing immodest in wearing pant suits. The point of a male not wearing a female's mantle had everything to do with those tidy whiteys. Respecting the scrotum matters. Concealing the genitals is a requirement of modesty.

Modern dress provides plenty of opportunity to express ones, masculinity, or femininity. What does not get advertised is gender. Eliminating the expression of the nipple is a fine choice for adding to modesty. So is wearing a brassiere, camisole, or fitted undershirt. If a shirt does not have a collar with adornment it is simply an undershirt. Go through your closets. Get rid of T-shirts unless they are worn as an under mantle (garment).

That a female has a bosom is simply God's way making it clear this person just might be carrying life in her. You might be harming two not one. Get it jack ass?

The Witch

So you Protestants got the happy notion God was wise about heterosis. Imagine God understanding what close breeding does with genetics. Weren't the mutations of inbred royals the world over reason enough for Marie Antoinette of Austria to make an alliance with a Frenchman? It sure didn't stop a revolution. "Let them eat cake" is infamous here.

Herds needed heterosis to thrive. The more homogenous the herds the more likely recessive traits that promoted disease entered into genetics. Why God's people would not have suffered miscarriages and barren wombs is because his males and females would have formed healthy genetic offspring because His unions are healthy. Again, you agents of Satan missed the real reason for God's commandments about family marriages. It must have been the bestial relations, against one's kind, that put you onto the obvious smoke screen.

The Lion

Understanding God's obedience training requires a macroscopic view. How does God get an eternally existing consciousness that occupies a planetary body to respect its one flesh union with its physical mate? Put a shitty little god on it.

Space is not the final frontier stupid. It is home. How does the shitty little god learn the consequence of his actions? Let him burn in hell. The demon is heading home with all God's lessons before God's kingdom arrives. Where does education meet opposition? The first-born spirit being, dragon, Satan that wants all God's creation to worship him. Not all God's creation likes that idea. Imagine that. God's woman was the last viable threat to Satan remaining as god of the world after Christ's kingdom. What was Satan's motive? Destroy all living beings leaving only herself.

This first born being with her mate has life in God's kingdom living righteously as a human union, husband and wife, because Satan was created with all the features for that consciousness to be the ultimate sacrifice so all creation could live. Satan opposed God and Christ with every lesson possible for all creation to learn how to host God and live Eternally. Why? because Satan, God and Christ created will every possible beauty to want to be the only living being. Hanky?

Playing Dirty

March 25, 2021

he dice roll of Rutherford against God.

Mapping to **not** Satan means only seeking righteousness. mac made it clear she was never after worshipping any deity other than God Almighty who sent a male, man, as His son to save humanity. That is the simple essence of what a child understood and with every prayer she made it clear she wanted to know who God was. How do I as a human live with God's protection and blessing? How do I make sure I never worship Satan and the demons? That was mac's dedication of purpose from the first she learned of religion. The simple understanding a child has.

At the very least the Jehovah's Witnesses put some form of scripture in Mary's hand that she allowed mac to read. That was the book mac read aloud and she hated her mother reading it to her. Mary did an outstanding job on animating Satan's voice as a serpent when reading Genesis. mac struggled to read anything other than the subheadings of the other Watchtower publications.

It Went Like This

"My woman has been born."

God

"What does this mean?"

Future Niggers

"Satan's reign as god of the world has ended."

God

"So who is God?"

Humanity

"I AM"

God
