

# Tongue Starts the Fire

## Or, Tip Toe through the Two Lips

October 6, 2022

**R**omans added to English, at the time of Bible translation, *v-i-p-e-r*. This common word is Latin; *vivus* meaning alive, and *parere* bring forth. The Latin Vulgate Bible kept treasure in its language the origins of the Roman Catholic Church. The Letter of James is the title inspiration from the truth of fire; that a small member, tongue, starts a major conflagration, metaphorically related to a small spark setting a forest ablaze.

The Mosaic Law is what Spirit agreed to. Was there liberty taken in its interpretation? By no means. Simply time through generations until God Almighty was presented from man for the hour glass of flesh to be in the place of Spirit demonstrating fulfilment. The Kingdom of Christ being the simultaneous fulfilment vehicle of Jehovah's kingdom is the damming event against Jehovah's Witnesses, the sicko religion of New York and jolly o'l England. The power of the Heavens bestowed on that wad is terminated the earth over. But wait, there is more. The Democracy of America was piggy backed on that power source and the world over Germans, Japanese, Ukrainians, Poles, Italians, Greeks, Serbs, Turks, every Jewish and Orthodox extraction the earth over and well as "primitives" That would be the coloured Pagan's who reformed to "Christianity," because they knew that was the collective bargaining for survival. The world over, non-virgins all of them recognize they have their own Deities back in play and Jehovah only has strength on US soil. We make this clear, until through Canada is subdued you do not have authority over Alaska United States. And no, you have no islands.

What does the U.S. Military have? man. The Heavens will play a dirge for her over what she has for an army. A strong hand at the keys and a stronger constitution to endure the perversions of witchcraft's workings freed her an army of former slaves to sin.

The only way the expendable United States Military has a means to live to fight another day is enduring their work load living according to mac's moral constitution. No longer is an American desirable breeding stock to anything other than a fellow virgin. This is of course if a fellow virgin is even willing to breed. What does that mean? Soldiers will be fucked, at their own expense, to spread disease or put that fool in prison for rape. Fornication is going to be the tool the masses use with every other vice that a virgin soldier seeks.

Ukrainian's like other nations in favour with the United States are going to be anxious to demonstrate that their gGod's are powerful over their enemies and Jehovah is just another enemy. Who is not? mac. And what is mac telling her soldiers? Return to U.S. soil or you will be slaughtered. You want help closing bases before your troop numbers are cut in half? You need deputies in mac's High Priest Office at war. What are We at Team God taking? The lands of Abraham and the continent of Africa. There will be no prisoner's of war.

We break for a moment. Tubby the grouse, Mr "FDNY" is walking about Starbucks with soiled shorts. As in there is excrement staining his pants from the inside out. Now you understand why Starbucks at South Staples and Weber (oops, Doddridge) has difficulty ridding itself of the indoor flies. Making room in America for garbage like him is why the Justice Department is being wiped out with civil war and servants of civil law are now in the same place of empowerment on US soil as the gang bangers. Your witchcraft you have made false. You stupid mother fuckers. What else? You have no power over outside of the continental-contiguous United States and the gGods of Mexico are going to devour the DEA as easily as they traffic children to India for sex. What else? Your Embassies are not havens. The Embassies of foreign nations are more powerful on American soil than even the workings of Washington D.C. on its own soil.

The obvious English lesson with this article is citizens of the British Commonwealth mac will extinguish every place she encounters them. They are not required to be bled. Just executed. They can fill impact craters across Africa as flesh pots marking, "mac was here". Cleaning Africa will follow the return of the beasts-of-the-field across all the land mass of the other half of the globe.
