

Twinkle, Twinkle Little Star

August 14, 2021

Gravitation is not constant. And how star magnetism works.

The laws of planetary motion based on a constant for gravity are wrong. Gravity changes with time. What is more, the assumption that materials from earth sent into orbit have a negligible affect on planetary motion and mass are also wrong. Everest was the limit for that very reason.

What did God say when the flood waters he receded?

"Man needs to see his limit. And what is more should he dare reach for it, there is a consequence to his very life. Survival is possible there a little while."

God

This is running out of the critical thing he can not see but he needs to live. This should have put a restraint on a demon too. But following Satan is a dead end.

You want a manned space station? Fine. Its course needs to be moved to compensate for the loss of mass to the earth from the station as earth moves through space. Do you see the fractal here? What is more, unless there is an occupant sharing the risk with the invention God is not tolerating it in space. It serves no purpose and only feeds Satan data that the human refuses to understand the meaning of from God.

A closed system model of all things would help. The problem? You refused to understand God in the first place.

Playing Baseball with God

How about those Astros? Oops, asteroids? What are you going to send out of balance against another planet moving asteroids? At least you think that will save earth. What is sent out of

balance further only to bring earth more immediate harm? Satan's vandalism of space is older than Norfolk's Waterfront Park vandalism.

Don't worry on this one. An asteroid will only cool the planet. Climate change, Team God, measures in megatons like a hydrogen bomb.

God's Rule, Life Lives

How does life live? Never may a rule of one destroy the life of another. For this to work all creation needs God not god. With god there is only one, eventually. When sin entered Eve's genetics was corrupted. Perfection, sinlessness, could not happen until God's Kingdom.

The Transfiguration's Opening of Heaven

This brings us to star magnetism, the shitty little god syndrome mac calls twinkle twinkle. She has some glad hands she waves in contempt at this as she says, "Oh, right, twinkle twinkle" when learning about the division of souls from Christ. While an individual casts ones eyes to heaven, gazing for comfort where it is possible to see the twinkling star, bear in mind the spirit consciousness system of beliefs of the heavens is fixed at the point in time to mac's heart being circumcised. All deeds a person performs from heart puts them in the place of mapping to the twinkle twinkle that admires them. This means, Ggod is watching you and with everything you do, when you are acting on the sin in your blood to make a move you are mapping to some twinkle twinkle and it is not righteousness. This is why you are such fucker fuckers.

What happened at the transfiguration when the heaven's God opened up? Jesus was declared God's son and humanity was opened for demon business. Demons could be forced on people, genetically match those born with the corrupted heart, or a person could really just be after owning that beasty because damn, they really loved sin's reward.

Insurance

mac's heart circumcision happened June 1970. She could not make a prayer that bound God's power, the only being, spirit, she could be mapped to was, Christ (with Saint Paul) and she had to be mapped to a twinkle twinkle, that was the business of Christ's fulfilment for creation in the first place. This is the answer to why did she get the Christ? Had her mother not gone after murdering her she would have mapped to Satan.

Topsy Turvey

Christ, resurrected to heaven, secured righteousness and waited for Eve to be born again after heavenly warfare and joining Saint Paul. It was Christ and gGod in heaven with Satan on earth as god of the world with her demons. Satan's twinkle twinkle froze God as god. mac's birth should have meant god forever. Why? god was the deity.

What did god need? Her own woman. Enter Mary McRae's birth. This is why she is so profoundly powerfully evil. She was concocted by Satan using the twinkle twinkle of god.

With mac's heart circumcision Christ's righteous unchangeable light was frozen in space time as Twinkle Twinkle with God and all other twinkle tinkle was simply the ideology of some demon. God was now in the place of holding his creation's beliefs and was Ggod with the blessing to come of the Christ. God took His throne after mac's slavery ended and she served some brutal duty building God's identity for creation.

What Imbalanced Scales Mean for Ggod

What mac struggled to learn was some of the difficulties she experienced were because she was being taught, in America every law and ideology was built so that no person could possibly be who she claimed to be. That is the foundation of Protestantism. The reaction of most, 'How could you possibly believe you are who you say you are?' Satanist's knew who she was. And God had to protect her. To stop her from mapping Ggod to Christ, God, is as wrong as stopping mapping Ggod to Satan, god. That is imbalanced scales.

God does not have a problem with dictators and martial law. He hates fornication. Dictators with the life live's rule win God's approval.

Why did Christ experience death at God's hand? Because every moment a thought experiment in creation meant that Christ would have destroyed herself as womb of creation she experienced death. When Christ experienced life and only life creation was launched. God was not about to be god forever. He had enough of that shit.

Crime Does Not Pay

Christ could no more alter the environment with prayers of heart from mac, than other demons could with the person that hosed (oops, hosted) them. The freeze of twinkle twinkle's effect on humanity ends with demon intimacy.

With heart circumcision the only deity all mac's actions could map to was God because her circumcision of the heart was not a covenant but the real McCoy. This meant even when she acted on sin or was subjected to it, she only felt God's wrath and lessons. What was worse, God had to put her in the place of acting on the sin in her blood just as if her heart had not been circumcised. And Christ (with Saint Paul) was subjected to Mary's brutal ride and consequences. And who had to circumcise the heart of his genetically corrupted woman to save her, god. (God says, Boom Baby!")

August 21, 2021 is when mac is united with Christ. This is one fulfilment of mac's bringing the bridegroom to the feast. This is the high priest with God's ark. When righteousness is built into the system because the actors are known, and God would never allow imbalance, righteousness happens. How long, God and Christ engineered the womb of creation we do not have a way of knowing from our earthly point of beginning frame of reference. Better guesses are possible.

Because of mac's being alienated from God's physical influence on her body she had no way of understanding the union had not already taken place. What did the demons know? Christ and mac would be united. It was no fair if they were not given the same intimacy with their host. mac learned why she was never allowed the belief system that being single was acceptable for her. She had to marry the Christ (with Saint Paul) for God's kingdom to happen and she is God's woman.
