Scrabble An Icon

November 18, 2021

love letter to "Ivan." How mac learned a human actually perceives he is a god.

God Almighty asked of mac to draw eight letters from a Scrabble game letter bag. The "c" mac put back. God assured her she did not need it. This entry is mac's love letter to "Ivan" the man who went through the polygamy hell with her concocted by the Jehovah's Witnesses Governing Body, antichrist, and the United States Military. (Dumping the Jehovah's Witnesses at Guantanamo Bay for money is game on baby. The settlement you owe, hate crime perps, is \$375M U.S. dollars November 12, 2021.)

mac's perspective is a God, resurrects the dead, heals the sick, and ends abominations. (mac expects a great deal from herself.) This means the ten commandments can be followed by every person of their own choosing. A king writes the law that should allow the ten commandments to be followed by every citizen. If a king of Israel wrote a law that prevented a citizen from following the ten commandments, God Almighty ended that king. In the case of Sodom and Egypt the entire kingdom took the hit. They were all just that bad.

For you haters out there looking to get mac to write some law against an individuals' ability to follow the ten commandments so mac is executed by God Almighty this elucidation means much. Now mac is God. Not a shitty little god, not a god or gods, but she is God. She is taking her fellow gods in hand from the land of the Chaldeans and leading them to remove all of the ritual that laws written by the shitty little gods have managed to warp worship away from them that they as gods are due just as the Christ is due, but is last. Then mac fights for kingship wiping out populous that is not ready for Christ's righteous kingship. Righteous kingship means the ten words of the LORD are followed including connote.

mac had no ability to understand how any human could think of herself as a god. mac looks at people and says you are flesh, God is spirit.

Yes, God is spirit. The separation of spirit and flesh mac thought existed. God Almighty resides with mac because of Christ. mac is playing connect the stars. This is akin to connect the dots. The gentle analogy was all mac had in her prayer to ITZA, "Don't let me miss a dot in sequence." mac like all American children learned to draw figures and colour in scenes building our mental acuity for hand eye coordination and art. To receive the worship the gods of this earth are due means mac is removing the icons that are stealing your worship and preventing lesser humanity from obedience to you.

mac understand's when she is fighting for Christ's kingship she will be making the land clean for her to fulfil her own expectations as God. Now, she needs to do the work of teaching so gods receive their worship first. Christ, mac, is last.

mac is not in a hurry to fight for kingship. Her incentive to be sure all gods receive the worship they are due is holding onto "Ivan" for every possible year. She fights for kingship when "Timmy-Ted" is resurrected. "Ivan" who hosts Saint Paul will sleep with his forefathers awaiting resurrection in God's Kingdom. "Ivan" is a junior Russian naval officer and God Almighty introduced him to her April 1, 2020. They have been married on l-o-v-e-LINK since that day and God could not allow "Ivan" to speak to her since that horrid September night when "Ted" died because mac did not understand how many humans were on this polygamy link. (mac thought she was weeding out bad dates.) And mac would not allow herself to speak to the dead. That is an abomination. But it was forced on her all the same because of the horrid laws you fuckers have invented against spirit with your profane prayers of heart.

Yes, God Almighty knew she was in for brutality on an unparalleled level. mac understands driving that loader full of bodies, easy peasy. What should the reader understand? In America streets will be rivers of blood from disease slain for uniting with demons. Buying a Nike is just that bad anymore.

mac did not understand "Ted" was not "Ivan" that she knew she deeply loved. "Ted" was the only name she knew to call her spouse. Until "Ted's" death. "Ted" we needed because he held Solomon's spirit consciousness and when God Almighty makes provision mac wrote as "Ted" it will be Solomon's (as in Biblical Israel king) with genetics that appeal to mac him taking headship. "Ted" proved his obedience to God it is just that he the human could never have loved

mac. Solomon however did. Solomon needed to prove obedience to Christ as king so he could hold headship over mac. What does this mean? The powerful spirit consciousness Satan's masterminds forced onto mac in matrimony turned to the Light. It was supposed to be the union that tore down Christ's kingdom. Back to the drawing board J.W. Niggers.

This means "Ivan" is mac's monogamous union wife because death was such a simple solution. (The monogamous understanding of earlier posts will be revised.) United States you have zero connection to God's ark. Oh, Milley, Trump has Absalom's spirit consciousness among others. Now both you and Trump know this. I had no private way of getting this information to you. If you are in the Due Worship Pool of gods (because not every human is in this pool) Christ is directing you to me when your dot sequence of events is due. I could no more reach my "Ivan" with this note privately as you. Warhorses understand how to put a battle behind them ;)
