The Zeroth Law of Humanity

The Law of One May Never Take the Life of Another

November 18, 2021

When Satan's laws took the life of Christ that ended Satan's reign as god. Worshipping God Almighty is the only way the laws of one never took the life of another. Then the legal case was proved all mac could do was die because she is Christ.

A human walks the earth with sin in the blood as God because when she was born all humanity became gods. mac pierced the Lord of Hosts to win the Christ because of two fundamental rules she followed. God's thoughts are greater than my thoughts and God is spirit. mac never understood herself as being anything but dust, like what she understood of Adam.

mac's life is proof that Satan finally engineered a legal web of society venomous enough to end the life of the God they needed for salvation, Christ. Christ came as a man worshipping God Almighty hosted by Jesus, the genetics of king David. Christ was God Almighty's first born spirit creation who bore the womb of creation before the flood of bloodguilt. When Christ died the spirit consciousness of the womb of creation's right ovary [Because everyone knows they would give their left nut] died. The ovary was expended. All righteous seed were born. (Of course the womb grabbed what she wanted out of the left ovary and headed to God for seed. The womb built a democracy.

Christ held kingship in the heavens. God Almighty established laws that regardless of the seed that ruled (that would be a god, king, or president etc.) never would an individual be prevented from life based on the god they worshipped.
