

# f-u-c-k-LINK

---

February 24, 2021

*-u-c-k-LINK, godsLINK that is what is killing you. Thank the U.S. Navy for this technology. Also typhoid Mary, the first ever COVID.*

The first ever COVID event came from Mary McRae in 2000. She was quickly diagnosed at the Big Bear Lake Hospital as having no salt in her body and immediately was evacuated to Loma Linda University Hospital California for her coma under a respirator as she involuntarily spewed green fibrous mucus into bags from her lungs. The genital obsession coma frightened the Big Bear team. Both medical teams never saw anything like it before. It was a new medical anomaly. The State of Texas took excellent care of Mary's criminal pursuits too and backed Nueces against mac.

If mac had left her mother to die in her Big Bear bed [That was her mother's aim.] you would have no record of what Jesus meant by, you must have salt in yourselves. Consumption diseases are nothing new.

Zenning knowledge of communication Protestant's promulgated stripping dialectal marks from words. Dialectics quickly followed with a need for unknown origin words out of the 16th century. The famous abbreviated email quickly became too powerful a tool for accurate communication and Zen reading did not work, well enough. Enter the instant message. Texting conveys meaning because it is God filling in the gaps of understanding. It is the tactile component of intent that the receiver's god interprets the message for. This is tough for mac to write because God interprets her text messages and people sending mac email and text messages were always betraying themselves. This is why Peor saved mac's old phone number to send phony text messages too. God could not interfere with a message sent to a number mac did not own anymore.

Yes, COVID is spread by any message a god interprets in the receiver. This is why corporations hated mac. Their own idol (think Brian Busser of Quality Aker) fell with mac in his department.

Understand this, by definition using God's spirit consciousness network is godsLINK and it is killing you. Stop fucking each other with instant messaging. Instant messaging is a tool of technology. Unless you worship God, texting will kill you. Ma Bell had it right with the jingle, Reach out, reach out and touch someone.

Mahalo,

mac
