

Right to the Rules

January 30, 2020

It is absolute; garbage, refuse, excrement, and the blindness caused from sin's creator, the man slayer when she began, Satan, that the true God is battling for universal sovereignty. Handing the Christ a harem bride is perversion.

The rare honesty you announce, false prophet number one, is "Jehovah's Kingdom," appropriate. You are sin's slave.

Sin's last-stand kingdom -- for those hands anxious for death -- is what follows the kingdom of the Christ. You do not understand that the true God's Word fulfilled His righteous law and made way for His Kingdom after sin's destruction. His final Kingdom for humanity, sinless. The battle? Destroying sin.

Sin's Way

Satan had her ambition to live forever. She hatched two plans captivated by her own vanity to effect that ambition. Humanity is fragile. Spirit creatures can endure knowledge of what is badness without sin in their spirit bodies -- consciousness. Consciousness is what a spirit being is. Knowledge of badness is what put sin in our blood. Equivalent to blood in humans is consciousnesses right to choose listening to good or bad.

The only chance Satan had to introduce sin to humanity was to capitalize on the information that Eve did not have accurately in mind. Eve's perfect heart could not choose death of her own free will. Adam neither. The tree of the knowledge of good and bad served a purpose. Satan could have left the human creation alone and saved herself. She did not. What the tree of the knowledge of good and evil allowed was that individuals conceived with congenitally defective hearts -- that never could have been born otherwise -- have a chance at life and some will choose life and live! That is the remnant of first fruits. The precious few that have life when they otherwise could not have ever been conceived.

Sin Destroyed

Sin is in the blood of each of us in its own genetic fingerprint when life is conceived. The developing foetus of people capable of serving the true God of their own free will are not born with a congenital heart defect rending them genetically incapable of choosing life. With environmental factors in play these can. Individuals born to Adam and Eve with this heart defect all live the opportunity to choose life in Christ's Kingdom. It is the choice they make of their own free will.

The Bottom Line

Sin is not capable of existing once God has destroyed it. All humanity in existence has no ability to pass on the congenital defect once sin is no longer in the blood. It is because God's woman works to perfect herself from sin living obedience to God, that He can resurrect humanity free from sin. Injuring her is tantamount to taking a sinless existence away from all humanity.

If there is someone desperate to believe that another Satan can exist, you Pharisee, forgot the simple truth; liars will not inherit God's Kingdom.
