

Spanish Dogs of War

February 7, 2020

California do you realize the blood guilt of your insurrection against the United States? How fitting for the Jezebel that represents California dogs eat alongside the wall of the United States you profane.

Jezebel the office of President of the United States is open to you provided you are, at least 35 years of age, you were born a citizen of the United States, and a resident of the United States 14 years. Using subservient offices to promote an agenda of hatred against the United States is profanity, and an abominable abuse of the power held by subordinates in the senate and congress.

Jezebel used her place as queen to commit murder furthering her own prostitution to her fornicating husband Ahab. The prophecy of Elijah from Me was the dogs would eat Jezebel by the wall of the city that bore her blood guilt. California do you realize the blood guilt of your insurrection against the United States? How fitting for the Jezebel that represents California dogs eat alongside the wall of the United States you profane. (Feel God's hatred for abusing headship.)

Consider Carefully California

California are you cheated in the population distribution? Do you understand the legal process for putting a bill before Washington D.C. to reform citizenship? Would you like to assert yourself as an independent nation? Cede from the Union. That is your legal right as a populous. Is civil war the aim you seek? Who would rush to your defence California? Will it be China or the Federales? Which of these governments would corporations based in California want to defend their patents? Which of these governments are better suited examples of fair labour?

California correct that spirit of Jezebel. Consider carefully the consequences of cessation from the Union. Mexico is a sovereign nation responsible for its abuses against its people and its neighbours. They are pitiable to a point. They are also the decedents of Spaniards that raped the

indigenous land holders for greed. Recall how Spain rose to wealth for a time? Spain was stripped. Spain received from her neighbours the judgments she delivered.

The United States is not perfect by any stretch of the imagination. It is however attempting to bring itself under My mighty hand. Reparations to native peoples were made but the crimes of the United States stemmed from the hypocrisy of religion, Satan's empire. It did not rape the native people for gold. The United States does attempt to abide by its constitution. Yes, rights to bear arms is a dangerous ground in this world. The property rights that have made you so wealthy -- on paper -- California are a product of the United States government.

Cities of Refuge

California do you recall what the cities of refuge were in the nation of Israel? A murderer innocent of malice, if they needed to escape an avenger of the murdered party, could escape to a city of sanctuary and live. It was a provision for an innocent person. Once a person crosses the boarder of the United States, entering illegally, they are not innocent of breaking federal law. Are you seeking to be a bastion of refuge against the laws of the nation that protects you?

Spanish Dogs

San Diego enjoys economic stability from the United States armed forces they host. Do the armed forces have improvements to make? Yes. Fornication and pollution are a problem. Blood guilt is the consequence of taking innocent life or transfusing blood. The United States Federal Government has changes to make to prove that it is under My mighty hand. Do not test the mighty hand that protects you California. Correct Jezebel or be eaten by the Spanish dogs of war crossing your wall.

Unfinished Business

California, you leveraged your economic prowess and lust to feed your disability class elite, too proud to work, and too 'wounded,' to live a day without mind altering drugs. So, you took your sixth most powerful economy of the world status and turned yourself into an experiment in expanding the perverse trafficking cartels South of the Rio Grande. How dare you scream for revenue when you are feeding a class of entitled cheats who are pilfering tax dollars to sit on their duffs as the middle-class diversity block of gerrymandered votes. California do not bank on

those beach front property values anymore. That coastline of yours is vulnerable and you are at fault.

Read this "united" states, repeal all forms of 'legalised' marijuana. If you smoke-it, snort-it, eat-it, or drink-it you do not legalise it. I even hate the use of transdermal cannabis. Cannabis destroys the conscience through the blood.

California you are a child heading to the hospital. Clean-up your beaches, get rid of your dependent "disability" users, get rid of legalised cannabis, and prevent drug lords from owning a piece of the "American" -- as in under God -- dream, end your claim jumping, and bring back the tent city to every state beach. Do these things or experience what being the over indulged child you legislated is costing everyone. California are you still the "sixth" largest economy? You are not worth fact checking.
