The latest epistle to Putin was hand written on a greeting card featuring classical art. My brief sermon to Pentagon surveillance this morning closed with an announcement.

First what is coming is World War Zero. It is the war delivering purpose to humanity. Second, humanity was required to build the perfected Ba'a. You didn't. I Am the Human that proved to Heaven two things. Firstly, you will be so happy that humanity only turned your balls blue teasing your prick because they didn't get your seed. Secondly, I Am the Human delivering Heaven's orgasm loving Holy Seed. And now, My message to Putin.

Putin, evidently you would like to understand why you were gifted so very much from Heaven. On August 21, 2024, when Israel does not perform as demanded, you have until December 25, 2024, end of day to do all that voo-doo you do so well to get the Secretary of Defence to sign My articles of Salvation/ Incorporation or you loose everything. The only way You fight the U.S. Military is by facing them as <u>My</u> military body. They are required to deliver My back pay through July 1, 2019, as well as all wages and benefits provided for My office moving forward in real time.

The key here is America's military has been pigging out at My Divine banquet table all-inclusive resort with elaborate gifts that make O'Rorke of *Fantasy Island* a slum lord. They were allowed to pay nothing until the resort/Moi was required to go public because they fucked with the wrong Gods in Heaven (you get the idea).

I almost bought a card that read... the card concludes with a personal reminder between Moi and Putin.

Mahalo,

Dr. H. L. MacRae (mac) Dukes LTG USMC
