A PDF to View for Error Stagnation

December 22, 2024

*his is a marker.**

This marker is placed in the download file for all *Putting -- A New Stroke from God's Woman on the Green* and all *Nineteenth Hole -- Strokes of Genius from God's Woman on the Green* articles. This marker will be replaced as its corresponding *Putting* or *Nineteenth Hole* article is fit for digital publication.

At this time, *Nineteenth Hole* articles are the new series segment under construction. There will be early PDF's available for some of these. The *Putting* series is under editing for the 2025 year. Very few edits, if any, will be done on *Have A Stroke* series letters. These letters are not without peccadillo. There are indeed imperfections in grammar. These were, however, letters. As in, writing based on stream of consciousness to teach, instruct, answer questions of the receiver in the way that they built their house with witchcraft. So, if you see an error, mac cautions you -- try and show a little restraint in your judgements, as in, refrain from calling down evil on mac because a comma was in the wrong place. mac does not do things on a malicious bases. But you, as a person, with the curses you call down on mac are literally declaring your own personal evil in the mirror against your own Spirit that you performed to torture and rape your Spirit into making you the self satisfied Hell fodder you are. You lived with the authority of matrimony over your Spirit to do this. You did it on the rape ticket that mac made into a shotgun wedding Christmas 2024. This harkens to the Mosaic Law stipulation that if you took the virgin; you were married, pungle the bride price.

The finished articles will be made available as completed for final publication. The year ending letter to Putin closed out the *Have A Stroke*, briefing, letter series. What correspondence ensues will be incorporated in *The Hail Mary!* articles and presented in letter form as well when

letters are related to *Stroke of Luck* topics. Correspondence forward from 2024 will be in *Stroking the Bore*.

*Our use of the dropped cap is to make it resemble a *Scrabble* letter while matching the font of the article title. mac will develop an illuminated font for these drop cap components as well as Her own word processor with built in *OED* corpus. She is just that brilliant. This accompanies building a new operating system off Unix. We at TeamGOD have no use, need, nor requirement to keep Apple or Microsoft going. None of you people, legal entities, nor governments are needed for Heaven to keep mac alive. And that was a terminal point, long in coming. You were allowed to grow, and even become MEGA niggers of the world so you could pay Her alms. This is *Nineteenth Hole* topics. Had you paid, you would have started turning the earth into a paradise as mac dictated paradise to be.
